Choosing roses for your table decorations, next function or overnight guests has never been easier. At Magic Garden Roses we have always been known for our quality rose plants but now we are also producing a range of bunched roses that are specially grown for all types of events from weddings to romantic getaways right through to corporate functions.

www.magicgardenroses.com.au

Our range has been selected from the very latest cut flower varieties available and feature extended vase life with some varieties even holding a delicate perfume. Added to this range we are excited to offer a specially selected range of old fashioned garden roses that are renowned for their romantic charm and elegant perfume. We have four generations of rose growing behind us so we know our roses and what people expect from a quality supplier.

Choose from our wide range of colours and sizes and stem length. We are located right here in the heart of the Yarra Valley so you can now buy grower direct and that means fresher roses at affordable prices and much faster service.

All our roses are grown right here on our farm and there are no imports. We also do bagged rose petals and they are picked on demand for extra freshness so now you have the complete rose package right on your door step.
